

Bridge Life Science all in one insurance package for start-ups

Bridge has compiled a package of insurance policies for Life Science companies after an inventory at its Life Science relations. The coverage and conditions are tailored to the industry. For insurances this implies that the most important risks are adequately covered. The Employee Benefits can be seen as being in line with the market. The package is available for companies up to ten employees. We make fully customized solutions for larger Life Science companies.

The package consists of:

Liability

Both your corporate liability and your directors' and officers liability must be properly insured in order to indemnify you against claims by third parties for damage caused to them.

Cyber insurance

Protection of intellectual property (IP) and guarantee of continuity. In particular, protecting your organization from malicious parties who shut down your business systems, access your IP, and extortion are important parts of this insurance.

Pension insurance

If your employee dies, the partner and children receive a monthly pension. Through a monthly investment, income for later is also accrued. Retirement is an important issue in the recruitment and selection process.

Income insurance

The absenteeism insurance takes over the statutory wage payment (two years) in case of illness of an employee from you. The WGA gap provides an additional income for your employee after these two years.

What do you get and what does it cost?

- All insurances in a comprehensive package for only € 2.900,-- closing costs
- Annual maintenance subscription € 630-- fixed plus € 105,-- per employee
- All other desired insurances without closing costs
- Don't need everything? Part of the package is also possible
- After five years or earlier, recalibration and tailor-made solutions
- Advice and guidance personal, handling as much as possible digitally
